

## Quarantine Technician (KSA)

We are looking for someone with technical and engineering experience who can take responsibility for the repairs of our equipment, supporting our global team to keep our kit available.

### Key Responsibilities:

- Undertaking the repair of all faulty equipment, ensure no more than 20 items are in quarantine at any one time.
- Ensure all commonly used spares are stocked at all times so that repairs can be completed in a timely manner

### Skills and experience:

- Ability to fault find electronics to component level using appropriate testing tools and procedures
- Ability to solder PCBs utilising through hole and surface mount components
- 2 Years Experience in repairing PCBs down to component level
- Computer literate and able to use equipment tracking applications and the Microsoft Office suite of software
- Ability to work alone, or as part of a team, working under pressure to meet set deadlines
- 2 Years Experience in diagnosing electrical and mechanical systems, ideally within the entertainment industry, such as moving light servicing
- Experience with keeping stock/service records up to date on a rental management system or similar software

In addition to these technical skills, you must also have:

- Very strong English language skills, both written and verbal.
- Great attention to detail.
- Enthusiasm, organisation and ability to operate with urgency.
- A Full driving licence.

### Package on Offer:

- Salary depending on experience + Paid overtime
- Mobile Phone
- 25 Days holiday + national holidays
- Company bonus scheme (after qualifying period)
- Medical healthcare
